1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Metals Creek Resources Corp. (the "Company") was incorporated on June 21, 2004 under the Business Corporations Act (Ontario). The Company's head office is located at 945 Cobalt Crescent, Thunder Bay, Ontario, Canada, P7B 5Z4.

The Company is an exploration stage company, and is in the process of exploring its resource properties and has not yet determined whether these properties contain ore reserves that are economically recoverable.

The accompanying financial statements have been prepared using International Financial Reporting Standards ("IFRS") applicable to a going concern. The appropriateness of using the going concern basis is dependent upon, among other things, future profitable operations, and the ability of the Company to raise additional capital. Specifically, the recovery of the Company's investment in exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to develop its properties and establish future profitable production from the properties, or from the proceeds of their disposition. The Company has working capital in the amount of $438,704 (December 31, 2019- $612,645) and has a deficit in the amount of $14,407,351 (December 31, 2019 - $14,038,728). The Company has not earned any significant revenues to date and is considered to be in the exploration stage.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption deemed to be inappropriate. These adjustments could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the IASB ("International Accounting Standards Board") applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34 - Interim Financial Reporting. The accounting policies followed in these condensed interim financial statements are the same as those applied in the Company's audited annual financial statements for the year ended December 31, 2019.

The policies applied in these financial statements are based on IFRS issued and outstanding as of May 5, 2020, the date the Board of Directors approved the statements. Any subsequent changes to IFRS after this date could result in changes to the financial statements for the year ended December 31, 2019.

The condensed interim financial statements do not contain all disclosures required under IFRS and should be read in conjunction with Company's audited annual financial statements and the notes thereto for the year ended December 31, 2019.

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates, and assumptions that affect the application of policies and reported amounts of assets and liabilities and disclosures of contingent assets and contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Actual results could differ from those estimates. Significant accounts that require estimates as the basis for determining the stated amounts include exploration and evaluation assets, share-based payments, allocation of financing proceeds, and income taxes. Differences may be material.

3. ADOPTION OF NEW ACCOUNTING STANDARDS:

IFRS – 16 - Leases

The Company applied IFRS 16 with a date of initial application of January 1, 2019 using the modified retrospective approach under which the cumulative effect of initial application is recognized in the opening balance sheet on January 1, 2019. Comparatives for the 2018 reporting period were not restated and are accounted for under IAS 17, Leases, and IFRIC 4, *Determining Whether an Arrangement Contains a Lease*, as permitted under the specific transitional provisions in the standard.

Definition of a lease

Previously, the Company determined at contract inception whether an arrangement is or contains a lease under IFRIC 4. Under IFRS 16, the Company assesses whether a contract is or contains a lease based on the definition of a lease as explained below.

On transition to IFRS 16, the Company elected not to apply the practical expedient to grandfather the assessment of which transactions are leases. It applied IFRS 16 lease definition assessment to all contracts including those that were previously not identified as leases.

Classification of a lease

As a lessee, the Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Company. Under IFRS 16, the Company recognizes right-of-use assets and lease liabilities for most leases on the balance sheet.

For leases of other assets, which were classified as operating leases under IAS 17, the Company recognized right-of-use assets and lease liabilities.

At transition, lease liabilities that were classified as operating leases under IAS 17 were measured at the present value of the remaining lease payments, discounted at the Company's incremental borrowing rate as at January 1, 2019. Right-of-use assets are measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments.

Impact on financial statements

On transition to IFRS 16, the Company recognized an additional $17,130 of right-of-use assets and $17,130 of lease liabilities, recognizing no difference in retained earnings as the Company opted for measuring the right-of-use at an amount equal to the lease liability adjusted by any prepaid or accrued lease payments relating to that lease, recognized in the statement of financial position immediately before the date of initial application, in accordance with IFRS 16.C8(b).

When measuring lease liabilities, the Company discounted lease payments using its estimated incremental borrowing rate at January 1, 2019 of 12%.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset will be periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability when applicable.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

The Company presents right-of-use assets that do not meet the definition of investment property in "Property and equipment" and lease liabilities in "Lease liabilities".

a. Flint Lake Gold Property

In 2007, the Company acquired an option on the Flint Lake Gold project which is located approximately 40 km east of Kenora, Ontario and consists of 14 claims totaling 160 units. The Company entered into an option agreement with Endurance Gold Corp. whereby under the initial option the Company could earn a 70% interest in the property by making share payments totaling 400,000 shares (completed in 2008) and completing work commitments of $200,000 on the property (completed). The Company exercised a second option to earn a further 5% in the property by issuing a further 50,000 common shares (completed in 2008) and spent an additional $250,000 on the property (completed). The Company has now earned a 79.7% interest and a joint venture has been formed on a 79.7% (the Company) and 20.3% (Endurance Gold Corp.) basis.

b. Ogden

The Company has entered into an agreement with Goldcorp Canada Ltd. ("Goldcorp") to jointly explore Goldcorp's mining claims located in Ogden and Deloro Townships, located six kilometres south of Timmins, Ontario. The property consists of 84 patented and unpatented claims totaling approximately 1,184 hectares (the "Property"). The Company has earned a 50% interest in the property under the terms of the agreement.

The Company was the operator of the Property during the earn-in period and afterwards, provided it held a 50% or greater interest in the Property. During 2012, the Company received notice that Goldcorp did not intend to pursue its back-in right on the Ogden property and as a result, the Company and Goldcorp executed a 50/50 joint venture agreement. If either party becomes diluted to a 10% interest, that interest will be converted into a 2% Net Smelter Return Royalty.

During 2018 the Company applied for and received a grant through the Northern Ontario Heritage Fund's Junior Exploration Assistance Program administered through the Ontario Prospector's Association. The amount of this grant was for the maximum eligible amount for a single project of $100,000. The grant was reflected as a reduction of the deferred exploration and evaluation costs associated with the Ogden project.

c. Dona Lake

The Dona Lake property consists of 32 patented and leased mining claims totaling approximately 430.1 hectares and covers the past producing Dona Lake Mine.

During the year ended December 31, 2019, the Company entered into an option and joint venture agreement with Goldcorp Canada Ltd. ("Goldcorp"), a wholly owned subsidiary of Newmont Goldcorp Corporation ("Newmont Goldcorp"). The option agreement allows for the Company to earn 100% of Goldcorp's interest in the Dona Lake property by issuing to Goldcorp a total of 7,000,000 common shares of the Company and funding $4,000,000 in exploration expenditures over 36 months as per the following schedule:

- Issuing 500,000 shares (issued) within 5 days of definitive agreement and TSX approval (the "Start Date") (received) and spending a minimum $500,000 prior to 1st anniversary of the Start Date (committed)
- Issuing 1,500,000 shares on or before 1st anniversary (committed) of the Start Date and spending an additional $1,000,000, to include a minimum 2,500 m drilling, prior to 2nd anniversary of the Start Date (optional)
- Issuing 2,000,000 shares on or before 2nd anniversary of the Start Date and spending an additional $2,500,000, to include a minimum 10,000 m drilling, prior to 3rd anniversary of the Start Date (optional)
- Issuing 3,000,000 shares on or before 3rd anniversary of the Start Date (Year 3 – optional)

After vesting, Newmont Goldcorp will have a one-time option to elect to earn back 51% of the Dona Lake property by spending $4,000,000 on exploration over the following 24 months.

d. Other Properties

Included in exploration and evaluation costs in Other Properties (located in Ontario and Newfoundland) are the Clark's Brook, Rogerson Lake, High Lake Sed, Change Island, Moreau, Cropeau, Rochon, Innes, Falls Lake, MacIntosh Lake, Hwy 527, Conmee, Greenwich Lake and Bittern Lake properties. Anaconda is also assuming an existing two percent (2%) NSR (the "Existing NSR") on one of the two licenses that comprises the Tilt Cove property. One percent (1%) of the Existing NSR is purchasable for $1,250,000. The NSR is capped at $1,500,000, after which, the NSR will be reduced to one percent (1%). Anaconda is required to spend a total of $750,000 in qualified exploration expenditures on the Jackson's Arm property during the option period.

During the year ended December 31, 2019, Anaconda and Magna Terra Minerals Inc. ("Magna Terra") announced they have entered into a definitive share purchase agreement dated October 14, 2019, whereby Magna Terra proposes to acquire all of the issued and outstanding common shares of Anaconda's wholly owned subsidiary, 2647102 Ontario Inc. Sokoman will be the operator during the earn-in period. Once a 75% interest is earned by Sokoman, either a 75%/25% joint venture will be formed, or Sokoman may elect to earn an additional 25% interest (to bring interest to 100%) by paying an additional $100,000 and issuing a further 2 million Sokoman common shares within 60 days of the third anniversary date. During the year ended December 31, 2018, Sokoman issued 750,000 shares and $10,000 cash to the Company pursuant to the terms of the Clarks Brook LOI. The payment was recorded as an offset to the remaining deferred exploration and evaluation costs related to the project with the remainder being recorded in the gain on sale or option of exploration and evaluation assets at December 31, 2018. During the year ended December 31, 2019, Sokoman terminated the option agreement with the Company and returned the property.

Metals Creek can earn a 100% interest in the patents by making cash payments totaling $310,000 over a period of 4 years following the execution of the LOI ($30,000 paid). The vendors will retain a 2% NSR which the Company can purchase 1% for $1 million.

During the year ended December 31, 2019, the Company entered into an Asset purchase agreement with O3 Mining Inc. to sell 100% of the right to its option on the Garrison project. Under the terms of the Asset Purchase Agreement, The aggregate purchase price (the "Purchase Price") payable by O3 Mining to Metals Creek for 100% of the Option shall be $250,000 and shall be satisfied by the issuance from treasury of O3 Mining of such number of Purchaser Shares as is equal to the Purchase Price divided by the issue price of $3.88 per Purchaser Share. The Company has calculated $223 (March 31, 2019 - $47,261) as share-based payments expense and under capital stock as reserves for the 6,027 options vesting to directors, officers and employees and consultants during the year:

- For the 6,027 options vesting from the January 3, 2019 grant, the fair value of each vested option is $0.037 and was estimated on the grant date with the following assumptions: dividend yield of 0%, expected volatility of 168%, a risk-free interest rate of 1.76% and an expected life of approximately 5 years.

- any options granted pursuant to the Plan shall expire no later than five years after the date of grant;

- any options granted pursuant to the Plan shall be non-assignable and non-transferable;

- the number of common shares issuable pursuant to the Plan to any one person in any 12 month period shall not exceed 5% of the outstanding common shares;

- the Plan provides that options shall expire and terminate 90 days following the date the optionee ceases to be an employee, director or officer of, or consultant to, the Company, provided that if such termination is as a result of death of the optionee, the optionee's personal representative shall have one year to exercise such options.

- the maximum number of common shares which may be reserved and set aside for issue under Plan is equal to up to 10% of the issued and outstanding common shares, provided that the Board may, subject to Shareholder and regulatory approvals, increase such number.

v. Shareholder Rights Plan

The Company has adopted a shareholder rights plan (the "Rights Plan") to ensure the fair treatment of all Company shareholders in connection with any take-over bid for the outstanding common shares of the Company. The Rights Plan will provide the Company's shareholders with adequate time to properly evaluate and assess a take-over bid without facing undue pressure or coercion. The Rights Plan also provides the board of directors of the Company with additional time to consider any take-over bid and, if applicable, to explore alternative transactions in order to maximize shareholder value.

Pursuant to the Rights Plan, any bid that meets certain criteria intended to protect the interests of all shareholders are deemed to be "Permitted Bids". A Permitted Bid must be made by way of a take-over bid circular prepared in compliance with applicable securities laws and, in addition to certain other conditions, must remain open for 60 days. In the event a take-over bid does not meet the Permitted Bid requirements of the Rights Plan, the rights issued under the plan will entitle shareholders, other than any shareholder or shareholders involved in the take-over bid, to purchase additional common shares of the Company at a significant discount to the market price of the common shares at that time.

Each unit consists of one flow-through common share and one-half of one common share purchase warrant, each whole warrant entitling the holder therein to purchase an additional common share of the Company for $0.07 until June 30, 2021. At December 31, 2019, proceeds of $175,250 were recorded as receivable and were received during the period ended March 31, 2020.

The deferred premium on the issuance of the 4,845,000 flow-through common shares was $48,450. This difference between the proceeds of the placement and the net amount recorded in the Company's share capital account is treated as a liability in accordance with IFRS. This liability is reversed into earnings as the Company incurs flow-through eligible exploration and evaluation expenditures. This reversal amounted to $4,467 for the period ended March 31, 2020 (March 31, 2019 - $3,088) resulting in a deferred premium balance of $43,983 at March 31, 2020 (December 31, 2019 – $48,450).
